Lighting Control Adapter P

TrolMaster's Hydro-X system can control most of the horticultural lighting fixtures sold on the market today. Most light manufacturers provide the ability to control their lighting systems using what known as a low-volt control. That low-volt control can take many forms and communication protocols. TrolMaster makes several types of lighting adapters (LMA units) that allow the Hydro-x to control lights using their low-volt control option.

This Lighting Control Adapter P (LMA-11) is specially designed for controlling Phantom LP ballast and Phantom 60 Series.
